C-arm covers

A complete assortment of disposable covers
for various C-arm devices from different manufacturers

- Universal models
- Siemens
- Philips
- Ziehm
- GE

PCU is CE and ISO 13485 certified.

A copy of the certificates is available on our website: www.pcu-bv.nl

C-ARM COVER UNIVERSAL COVER

One large shaped unit - a universal drape designed to cover a variety c-arm systems

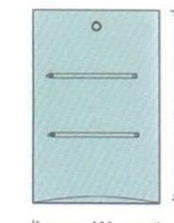

- Adhesive straps ensure secure fixation of universal c-arm cover.
- Easily placed on c-arm.
- Complete protection and sterility.
- Latex free
- Covers are made of high grade clear polyethylene

C-ARM COVER WITH ADHESIVE STRAPS

A single large unit to cover various c-arm systems using adhesive straps for fixation

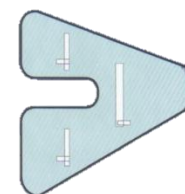

- Extensive range of configurations and sizes available.
- Telescopic fold permitting simple and user friendly positioning.
- Straps ensure secure fixation of cover.
- Latex free
- Covers are made of high grade clear polyethylene.

MINI C-ARM COVER

Single unit shaped and designed to provide complete and effective covering for mini c-arm systems

- Allows sterile handling.
- Easy and simple to place over mini c-arm.
- Optimal sterility protection
- Latex free
- Covers are made of high grade clear polyethylene.

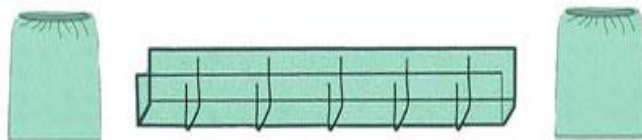

C-ARM COVER - SIEMENS

Arcadis series, siremobil, nultimobil

Functional, user friendly, clips system permitting full range of movement of c-arm

- Providing sterile handling of c-arm.
- Clips allow effective simple and secure covering of c-arm system.
- Complete rotation and movement of c-arm without compromising on sterility.
- Latex free
- Covers are made of high grade clear polyethylene
- Clip system variations:
 - **3 piece set**
1 clips system + 2 bandage bags 75 x 75 cm / 75 x 90 cm
 - **2 piece set**
1 clips system +1 bandage bags 75 x 75 cm / 75 x 90 cm
 - **clips only**
1 clips system

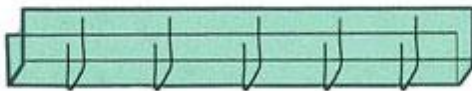

C-ARM COVER - PHILIPS

Endura, Pulsera, Libra, BV20, BV300, Veradius

Functional, user friendly, clips system permitting full range of movement of c-arm

- Providing sterile handling of c-arm.
- Clips allow effective simple and secure covering of c-arm system.
- Complete rotation and movement of c-arm without compromising on sterility.
- Latex free
- Covers are made of high grade clear polyethylene
- Clip system variations:
 - **3 piece set**
1 clips system + 2 bandage bags 75 x 75 cm / 75 x 90 cm
 - **2 piece set**
1 clips system +1 bandage bags 75 x 75 cm / 75 x 90 cm
 - **clips only**
1 clips system

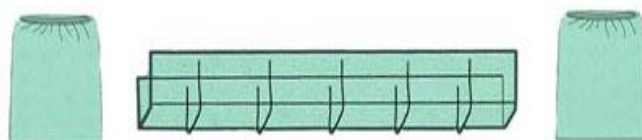

C-ARM COVER - ZIEHM

Vision vario, solo

Functional, user friendly, clips system permitting full range of movement of c-arm

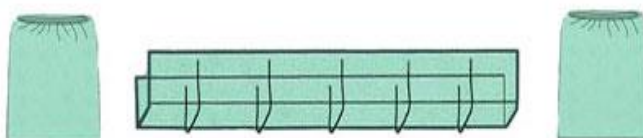

- Providing sterile handling of c-arm.
- Clips allow effective simple and secure covering of c-arm system.
- Complete rotation and movement of c-arm without compromising on sterility.
- Latex free
- Covers are made of high grade clear polyethylene
- Clip system variations:

Ultrasound probe covers

**A complete assortment of disposable protection covers
for the safe use of ultrasound probes.**

- Efficiency, there is no need to disinfect the probe after each use, just change the protection cover and the probe is ready for use.
- Optimal hygiene for patient and medical staff.
- Available in different sizes, for different appliances.
- Available in latex and latex free materials.
- Available in sterile and non-sterile version.
- The image quality is not affected by the use of protection covers.

PCU is CE and ISO 13485 certified.

A copy of the certificates is available on our website: www.pcu-bv.nl

ULTRASOUND PROTECTION COVERS RADIOLOGY

In radiology, different covers are needed for different types of transducers. These covers are available in straight or convex shape, of course in sterile and non-sterile version.

Latex

The latex covers are packed with a twistlock, which ensures that no ultrasound gel can run out of the cover. The sterile version is available with cable covers in various sizes, depending on the transducer used.

**Latex cover with
cable cover and twistlock**

Latex free

These polyurethane covers are longer, so they cover the probe as well as the cable. The covers are telescopically folded and therefore easy to apply. Each cover is packed with 2 fixation strips, 2 elastic bands, 1 pack of 10 ml ultrasound gel. These covers are only available in a sterile version.

**Latex free cover with
2 fixation strips,
2 elastic bands and gel.**

Self-adhesive, latex free

A unique design with self-adhesive straps for improved probe fit and eliminating the use of gel. These polyethylene covers are telescopically folded and therefore easy to apply.

**Self-adhesive
latex free probe cover**

**ULTRASOUND PROTECTION COVERS
Gynecology & Urology**

For use during trans-vaginal and trans-anal ultrasound examinations.

The distribution and transmission of the sound waves is perfectly guaranteed by a thin, but very tear-resistant material texture.

Because of the precise fit, the ultrasound gel will spread evenly over the transducer, without running along the cable.

These covers are available in straight or tapered shape, of course in sterile and non-sterile version.

**Latex and Latex free covers
for use in
gynecology & urology**

**ULTRASOUND PROTECTION COVERS
Cardiology**

These covers for trans esophageal studies, such as TEE, are available in sterile and non sterile version. Important is the availability of a latex free product.

These covers can be ordered as individual covers or as a complete set.

This set contains a syringe with ultrasound gel, a bite guard and a twistlock.

The complete set is available in a tray with individual components or pre-assembled.

**Latex and Latex free covers
for use in cardiology.
Pre-assembled and in tray.**

ULTRASOUND PROTECTION COVERS

Intensive care

These covers are designed to protect rectal temperature probes.
They are available in sterile and non-sterile version, in two different sizes.

ULTRASOUND PROTECTION COVERS ACCESSORIES

Ultrasound gel

We offer ultrasound gel in various packs.

A pre-filled syringe with 10 ml ultrasound gel, sterile and non sterile.

A sachet with 20 ml ultrasound gel, sterile and non sterile.

The larger quantities are a bottle with 250 or 500 ml, or a can with 5 liter.

Biteguard

We can offer 2 different types of bite guards.

The bite guard is available with or without elastic head band.

Both types are available in sterile and non sterile version.

Cable covers

We can offer 4 different sizes of cable cover, depending on the transducer used.

These cable covers are all sterile.
